

FOAMiit

product catalog

Why FOAMit?

FOAMit builds innovative cleaning equipment for chemical management and application. Our customers and end users know we build easy-to-use and easy-to-maintain products, backed by exceptional customer support.

Founded in the 1980's by Dan Jacques, FOAMit has built a reputation on quality products and innovation. Our engineering team doesn't rest on good enough. We are dedicated to improving our current products while innovating for the next generation of products.

As a value-driven company, we care about more than the bottom-line, we're all about making "it" better for you. When you work with FOAMit you have an ally in the fight for clean.

Our top priority is to our customers and meeting their needs. Need a chemistry application unit that you can't find in this catalog? Our tech and product teams can partner with you to create a custom solution.

Ready to order?

Reach out and one of our friendly experts will be happy to make your day.

Portables

Trusted workhorses since their introduction in the 1980's, our portables take your chemistry where it's needed. Each unit is highly configurable with cap and hose color options, wand selection, and various hose lengths available. Additionally, choose pump seals for maximum chemical compatibility available in Viton, Kalrez, or Santoprene.

From the front facing drain and built-in hose storage, to the quick-change pump and modular hinged back plate – our innovative portable units are designed to be easy-to-use and maintain.

Foam, Spray, Gel, Smart Foam, and Fog + Mist configurations available.

foam

fog + mist

The Good Stuff

- **Easy to use, easy to maintain**
Designed for portability, efficiency, and hassle-free maintenance. Our quick-change pump and tool-free, hinged access plate reduce downtime when a repair is needed.
- **Natural tank**
See chemical volume levels at a glance.
- **Configure with color**
Lids and hoses come in a variety of colors to match your chemical management systems and quickly tell units apart.

Concentrate

Color options available - p. 47

Our portable concentrate units dilute chemistry on the fly and ship with a variety of metering tips to meet your dilution rate. Each unit contains a 15- gallon water reservoir and holds two FOAMit chemical jugs (2.5-gallon and 5-gallon options available, see page 28-29) or use your own chemical containers. Units available in foam, spray, and dual function foam + spray.

15 Gallon (56.8 Liter)

Wall Mounted Units

Pre-Mix - p.12
Concentrate - p.13
Fog + Mist - p.14
Central Systems - p.15
Doorway - p.16

Wall Mounted

Wall units come in a variety of configurations and uses. Whatever your need is, chances are we have a wall unit to meet it. Available in foam, spray, fog, mist, and dual function units for pre-mix or concentrate with configurable hose color and lengths. All wall units can be fitted with a lock to protect internal components.

Drop-stations for central systems are wall units that pull chemistry from a secure location at your facility. These are also available in foam, spray, fog, mist, and dual functions and can be configured for hose color and length.

Wall-mounted doorway foaming units protect transition zones. Foam clings to wheels and footwear as they pass through entrances providing a robust tool in the fight against cross-contamination.

foam

spray

fog + mist

The Good Stuff

- **Flexible configurations**
Foam, spray, fog, mist, or dual function options with customizable hose colors and lengths to suit your needs.
- **Centralized control**
Drop-stations draw from secure central systems, ensuring efficient chemical distribution.
- **Entryway protection.**
Doorway foam units create a strong barrier, preventing cross-contamination at entrances.

Foam Pre-Mix Poly Fittings

FI-WL-AP

- Air powered foam - all poly fittings

Spray Pre-Mix Poly Fittings

SP-WL-AP

- Air powered spray - all poly fittings

Concentrate

Color options available - p. 47

Wall mounted concentrate units ensure consistent and reliable chemistry application. A water regulator inside the unit keeps dilution rates consistent, regardless of changes with incoming water pressure. Don't let your chemistry take blame for problems caused by imprecise equipment.

When consistent performance counts, choose a concentrate unit that can deliver.

Fog + Mist

Color options available - p. 47

Originally designed for dumpster odor control, these units can also be used for dust suppression, sanitizing, humidification, and pesticide application.

Each wall-mounted box has a programmable repeat cycle timer. The FOG-IT6 / MU-6 can be configured for 12 nozzles (35 micron droplet size) to 20 nozzles (15 micron droplets) per box.

Talk with your salesperson to see which units and nozzles would work best for your application process.

see more details

Pre-Mix

FOG-IT-DS	● Electric powered fog - with timer
-----------	-------------------------------------

Pre-Mix

FOG-IT6	● Air and electric powered fog
MU-6	● Air and electric powered mist

Central Systems

Color options available - p. 47

Reduce complexity while saving labor and time. Central systems deliver ready-to-use chemistry throughout a facility, pumped from one, secure location. Our systems are highly customizable – mix and match drop station functions to get exactly what you need, where you need it.

Contact your equipment sales representative to learn more about which drop-stations, pumps, and proportioners fit your needs.

Foam Station

Up to 6 x 3 ft. (1.8 x 0.9 m)
at each nozzle

Footwear Sanitation

Air Powered - p.20
Foot Powered - p.21

Footwear Sanitation

Footwear sanitation is important for compliance and quality. We offer footwear systems that connect to compressed air (SS2, SS3) or work with the power of the human step with no utilities required (SS4).

Our single-foot units (SS2 + SS4) are configurable with a standalone handle or a boot scrubber with handle. Our walk-through sanitation unit (SS3) applies chemistry to both soles evenly, perfect for high traffic transition zones.

All footwear sanitation units are compatible with alcohol- and quat-based sanitation chemistry.

spray

The Good Stuff

- **Easy to use, easy to maintain**
Just step and go; sanitizer is evenly applied to footwear. Collection basin is easy to access or swap out for cleaning when a repair is needed.
- **Low moisture**
Helps keep moisture out of unwanted areas while still providing an effective sanitation on your shoe sole
- **Transition zones**
Effective sanitation in high traffic entryways or transition zones

Chemical Management

Wall Transfer - p.24
Wall Mixing - p.26
Portable Transfer - p.27
Jugs - p.28
Locking Caps - p.30
Racks + Stands - p.31

Chemical Management

Chemical jugs, racks, stands, and transfer units make chemical storage and transportation secure and easy.

Chemical jugs come in a variety of cap and jug colors with options for locking caps, venting, and chemical pick-up lines. Choose between 2.5 and 5 gallon jugs.

Portable transfer units bring large quantities of chemistry to locations throughout a facility, available in three sizes and three wand options.

Wall chemical transfer units (TU and CTX) are easy to use when pumping from bulk drums to jugs or portable units.

Each facility has unique chemical management challenges, so reach out to us to learn more about options to meet your needs.

The Good Stuff

- **Secure and easy**
Chemical jugs, racks, stands, and transfer units make chemical storage and transportation secure and easy.
- **Durable and functional**
Designed to handle a wide range of uses, whether stationary or on the move.
- **Configure to your needs**
Chemical management can be challenging. Customize your unit to suit your facility's needs and enjoy peace of mind.

Wall Transfer

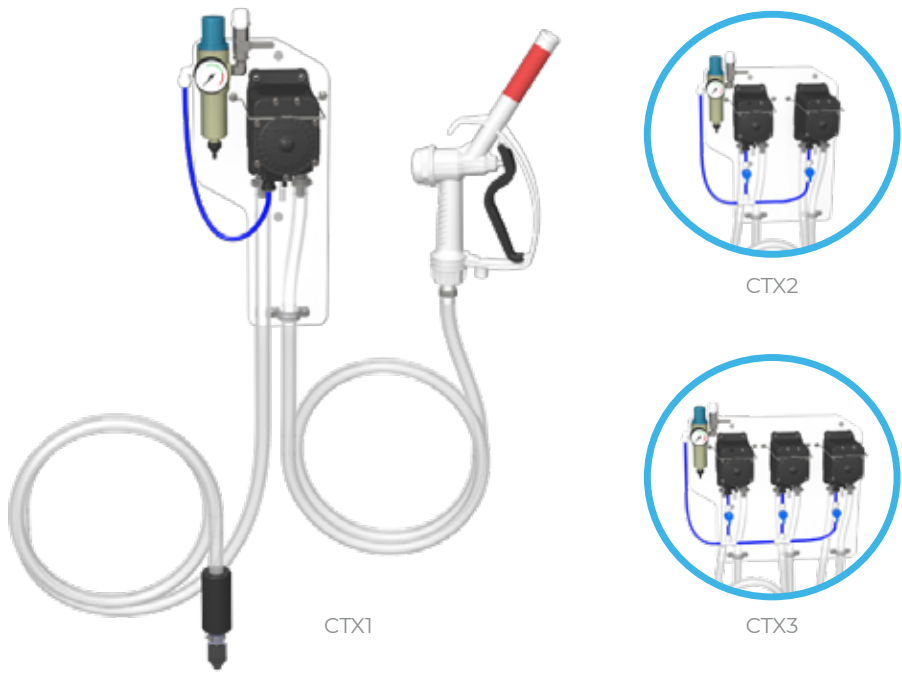

Configurations

CT	- Pump seal material	- Operating type
	Santoprene (WL)	Manual air button (AB)
	Viton (WLV)	Timer and solenoid valve (TMR)
	Kalrez (WLK)	

Examples:

- CT-WL-AB - Single product transfer unit with Santoprene pump seals and manual air button
- CT-WLV-TMR - Single product transfer unit with Viton pump seals, timer, and solenoid valve
- CT-WLK-AB - Single product transfer unit with Kalrez pump seals and manual air button

Configure up to five pumps

CTX	Number of pumps	Pump seal material
	One (1)	Santoprene (S)
	Two (2)	Viton (V)
	Three (3)	Kalrez (K)
	Four (4)	
	Five (5)	

Examples:

- CTX1K - Unit for one product; one pump Kalrez pump seals
- CTX2VK - Unit for two products; one pump Viton pump seals, one pump Kalrez pump seals
- CTX3V - Three products; all three pumps Viton pump seals
- CTX4SSKK - Four products; two pumps Santoprene pump seals, two pumps Kalrez seals
- CTX5 - Five products; all five pumps Santoprene pump seals

Note: For Santoprene only units, no option code needed.

Pump-Up Units

Manual Powered - p.34
Dual Powered - p.35
Drain Units - p.36

Pump-Ups

For smaller jobs and those hard-to-reach places, our manual pump-up units bring quality chemistry output wherever it's needed.

Pump-up units have Viton seals for the best possible chemical compatibility. For five and ten liter models, choose between an extendable wand or heavy-duty polypropylene trigger gun to match your cleaning program's application needs.

Our 1.5-liter pump-ups replace common squeeze-trigger bottles. Ergonomically designed with a thumb trigger to reduce wrist fatigue, these make quick work of small cleaning tasks.

foam

spray

fog + mist

The Good Stuff

- **Small size, big performance**
Same high quality output in a small convenient unit.
- **Natural tank**
See chemical volume levels at a glance.
- **Maximizing portability**
When you need to clean specific surfaces, our pump up-units are there. Even apply chemistry to those hard to reach areas.

Dual Power

We developed the Dual-Power version of our 10-liter pump-up to ensure pressure never drops. Hook up compressed air for steady pressure or for initial charging of the unit; if air becomes unavailable, manually pump it up to keep working.

In addition to our foam and spray assemblies, we designed dairy-specific units for hoof and teat treatments.

Drain Foaming

Biofilm in drains harbor pests, odors, and dangerous pathogens. Unlike liquid cleaners, foam expands inside pipes to contact the entire internal surface area – for 360° coverage. Foam pushes through pipes, reaching deep into the plumbing network.

Plus, foam breaks down slowly, giving chemistry optimal time to work.

Our manually powered drain foam units maximize portability to treat drains of various sizes and locations.

Drain Foam - p.40
Belt Foam Bar - p.41

Attachments

From drains to conveyor belts, we make foam attachments to clean them. All portable units can be adapted with quick connect fittings, allowing users to switch between attachments and wands easily.

Seeing the need for CIP conveyor belt cleaning options, our engineering team developed the Belt Foam Bar in six lengths. The Belt Foam Bar attaches to our portable units with a quick-connect fitting valve so you can quickly move between belts. A rinse bar assembly is also available.

Our Drain Foaming Attachments come in a variety of heights and drain cover shapes for circular, trench, and square floor drains.

foam

The Good Stuff

- **Attachments made easy**
Connect to compatible units using easy quick-connect fittings.
- **Versatility for every task**
Attachments come in a variety of shapes and sizes to fit all your needs.
- **Adaptable cleaning**
Switch between different foam attachments for various tasks.
